JOURNAL OF MARINE SYSTEMS

Contents Volume 12, 1997

Special Volume: Processes in Regions of Freshwater Influence (PROFILE)

Edited by K. Ruddick

Preface 1

Physical processes in the ROFI regime
J.H. Simpson 3
A numerical study of the ex-ROFI of the Colorado River
N. Carbajal, A. Souza and R. Durazo 17
Baroclinic eddy formation in a Rhine plume model
J.M. de Kok 35
The initial evolution of a buoyant plume
W. Fennel and A. Mutzke 53
The wind-forced response on a buoyant coastal current: Observations of the western Gulf of Maine plume
D.A. Fong, W.R. Geyer and R.P. Signell 69
Anti-cyclonic circulation driven by the estuarine circulation in a gulf type ROFI
T. Fujiwara, L.P. Sanford, K. Nakatsuji and Y. Sugiyama 83
The association of the population recruitment of gulf menhaden, *Brevoortia patronus*, with Mississippi River discharge
J.J. Govoni 101
Property fields in an effluent plume of the Mississippi river
G.L. Hitchcock, W.J. Wiseman Jr., W.C. Boicourt, A.J. Mariano, N. Walker, T.A. Nelsen and E. Ryan. 109
Fresh water masses in the Kara Sea during summer
D.R. Johnson, T.A. McClimans, S. King and Ø. Grenness 127
Temporal variability of the vertical stratification of a front in a tidal Region Of Freshwater Influence (ROFI) system
Y. Lagadeuc, J.M. Brylinski and D. Aelbrecht 147
Interactions of wind and density driven currents in North Sea ROFIs—a model study
H. Langenberg 157
Hydrodynamic prevention of eutrophication in the Bay of Brest (France), a modelling approach
O. Le Pape and A. Menesguen. 171
A conceptual model of the trophodynamical response to river discharge in a large marine ecosystem
S. Skreslet 187
Aircraft and sea-truth observations of a small-scale estuarine intrusion front
R.J. Uncles, J.A. Stephens and R.J. Murphy 199
Bathymetric influences on the lower Chesapeake Bay hydrography
A. Valle-Levinson and K.M.M. Lwiza 221
Seasonal and interannual variability within the Louisiana coastal current: stratification and hypoxia
Wm.J. Wiseman, N.N. Rabalais, R.E. Turner, S.P. Dinnel and A. MacNaughton 237
The PROFILE project: an overview
J.M. Huthnance. 249

The Rhine outflow: A prototypical pulsed discharge plume in a high energy shallow sea
W.P.M. de Ruijter, A.W. Visser and W.G. Bos 263
Modelling physical processes of haline stratification in ROFIs with application to the Rhine outflow region
P.J. Luyten 277
The seasonal cycle of nitrate in the Clyde Sea
T.P. Rippeth and K.J. Jones 299
Controls on stratification in the Rhine ROFI system
A.J. Souza and J.H. Simpson 311

Contents Volume 12, 1997 325
